# Apiary-ng

Rozšířený editor a nástroje

# Apiary

- Apiary
  - služba pro vytváření a sdílení API
- API Blueprint
  - markdown + rozšíření
- formát a nástroje pro specifikaci a testování webového API

# Blueprint

```
FORMAT: 1A
HOST: http://www.google.com
# Notes API
Notes API is a *short texts saving* service similar to its physical paper presence on your table.
# Group Notes
Notes related resources of the **Notes API**
## Notes Collection [/notes]
### List all Notes [GET]
+ Response 200 (application/json)
      "id": 1, "title": "Jogging in park"
     }, {
      "id": 2, "title": "Pick-up posters from post-office"
    }]
```

+ Header

Body

X-My-Header: The Value

### Markdown

- značkovací "jazyk"
- formátování pomocí prostého textu
- typewriter friendly
- snadno čitelné
- formátovaný výstup -> html
- verzovatelný gitem
- rozšiřitelný

## Markdown II

```
# API pro knihovnu
[TOC]
## Evidence knih
### Seznam metod
* metoda GET
* metoda POST
> [Jan Novák 12.2.2016]: Vel illum qui dolorem eum fugiat quo voluptas nulla.
  #include <stdio.h>
  int main (void){
       printf("Hello world")
```

#### **Documents**

-----

StackEdit stores your documents in your browser, which means all your documents are automatically saved locally and are accessible \*\*offline!\*\*

- > \*\*Note:\*\*
- > StackEdit is accessible offline after the application has been loaded for the first time.
- > Your local documents are not shared between different browsers or computers.
- > Clearing your browser's data may \*\*delete all your local documents!\*\* Make sure your documents are synchronized with \*\*Google Drive\*\* or \*\*Dropbox\*\* (check out the Synchronization)(#synchronization) section).

#### #### Create a document

The document panel is accessible using the <i class="icon-folder-open"> </i> button in the navigation bar. You can create a new document by clicking <i class="icon-file"> </i> \*\*New document\*\* in the document panel.

#### <i class="icon-folder-open"></i> Switch to another document

### **Documents**

StackEdit stores your documents in your browser, which means all your documents are automatically saved locally and are accessible **offline!** 

#### Note:

- StackEdit is accessible offline after the application has been loaded for the first time.
- Your local documents are not shared between different browsers or computers.
- Clearing your browser's data may delete all your local documents!
   Make sure your documents are synchronized with Google Drive or Dropbox (check out the Synchronization)(#synchronization) section).

#### Create a document

The document panel is accessible using the button in the navigation bar. You can create a new document by clicking New document in the document panel.

Switch to another document

All your local documents are listed in the document panel. You can switch from

### Markdown editor

# Problémy v praxi

- editace
  - dlouhá specifikace, orientace v kódu, obsah
- kolaborace
  - komentáře
  - poznámky
- ne-API obsah

# Problémy v praxi II

- verzování
  - Ize spárovat pouze s GitHub repozitářem
- export do PDF
- dokumentace
- pouze jedna odpověď na požadavek

### Zadání

- vytvořte/upravte jednoduchý editor API blueprintu
  - náhled, verzování, navigace, highlight
- rozšiřte API blueprint o nové značky / anotace
  - komentáře, revize, include
- exporty
  - uložit do Apiary
  - PDF, HTML, JSON-Schema, bez "JSONu"

### Zadání II

- OpenSource APL / GPL / MIT ...
- GitHub
- PHP / RubyOnRails
- nevymýšlet znovu kolo
